

# LAMPIZATOR 2024

| DAC            | PRICE        | PRICE         | PRICE      | PRICE         |
|----------------|--------------|---------------|------------|---------------|
|                | SINGLE ENDED | SE + BALANCED | SE VOLUME  | BALANCED VOL. |
| Horizon        |              |               |            | 1 330 400 Kč  |
| Poseidon       |              |               |            | 665 200 Kč    |
| Pacific-2      | 694 100 Kč   | 780 900 Kč    | 780 900 Kč | 867 700 Kč    |
| Golden Gate-3  | 462 800 Kč   | 520 600 Kč    | 520 600 Kč | 607 400 Kč    |
| Big7 MK3       | 260 300 Kč   | 318 100 Kč    | 318 100 Kč | 376 000 Kč    |
| Atlantic-3 TRP | 173 500 Kč   | 231 400 Kč    | 231 400 Kč | 289 200 Kč    |
| Baltic-4       |              | 173 500 Kč    |            | 231 400 Kč    |
| Amber-5        | 130 100 Kč   | 144 600 Kč    | 173 500 Kč | 188 000 Kč    |

| ANALOG PRODUCTS          |                                                                                                                                                                                                                                                                                                                                                                                                         | PRICE      |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| The Kraftwerk 10         | 10 AC outputs of which Eight independent filter blocks. Pacific chassis. 8 x 2300 Watts filtered, 2 x, 3600 Watts unfiltered, max 5700 Watts total, including two additional unfiltered outputs for monoblocks. Two filtered outputs have DC blocker and the two unfiltered outputs also have a DC blocker.                                                                                             | 115 700 Kč |
| Amber Amp                | Balanced, 4 inputs, EL84, 12WPC, amorphous transformers, OLED display with remote, headphone out                                                                                                                                                                                                                                                                                                        | 202 500 Kč |
| Amber Amp / DAC          | Balanced, 4 inputs, EL84, 12WPC, amorphous transformers, OLED display with remote, headphone out with Amber DAC inside                                                                                                                                                                                                                                                                                  | 260 300 Kč |
| Poseidon Preamplifier    | Ultimate tube stage based on the new Poseidon DAC. Octal 6J5 and noval 6N6P tubes. True Copper Lampizator capacitors or equivalent. Tubes outside chassis. Remote control, memory of settings, OLED display, muting, 64 steps resistor ladder discrete configuration. 2 RCA + 2x XLR pair inputs, XLR and RCA outputs, silver wiring in teflon insulation. High input impedance / low output impedance. | 636 300 Kč |
| Vinyl Phono VP4          | Single ended high end phono stage with 2 MC inputs, 1 x MM input, switchable MC load, 70 dB amplification, zero feedback, zero silicon, zero opamp.                                                                                                                                                                                                                                                     | 231 400 Kč |
| Vinyl Phono VP4 Balanced | Balanced as well as SE outputs via one balancing tube buffer high end phono stage with 2 MC inputs, 1 x MM input, switchable MC load, 70 dB amplification, zero feedback, zero silicon, zero opamp.                                                                                                                                                                                                     | 289 200 Kč |
| SILVER VP4 upgrade       | Silver version of VP4 The signal transformer is wound with pure silver wire. Silver capacitors are used in signal path. Copper PIO caps are in output stage. Flight case. Wood sub chassis base frame. Copper top. WBT sockets Price additional to base VP4 product.                                                                                                                                    | 115 700 Kč |
| GulfStream               | High end streamer, custom design fully linear Lampisator PSU build-in.                                                                                                                                                                                                                                                                                                                                  | 231 400 Kč |
